

# Project: Datacenter 100G Middleware

## Customer Objectives

- 100G WAN blade for NextGen Datacenter solution
- Application of coherent optics and DWDM
- Integration into end-customer's architecture

## AimValley Solution

- Development of Middleware application based on AimValley Software IP (AimOS)
- Team size: core team of 3 developers
- Engagement model: fixed price
- Period: February 2017 – summer 2018

## Key technologies:

- 100G Ethernet, Coherent optics, OTN

## Results & Added Value

Efficiency	Reuse of proven technology (software IP) 20% faster time-to-market
Successful	13 Load Drops, on time, with high quality
Partnership	Joint Product Definition and Development (2 customer entities and several 3 <sup>rd</sup> parties)
Innovative	Flexible system architecture
