

Has your Software development partner ‘Been There, Done That’?

An optimal time to outsource development of software is when you encounter a tricky function that your own software team has never tackled before. In some cases this is a cutting edge technology where you need experts that will not only get you to market quickly but also give you a solution that will work correctly based on the standards and perhaps interoperability you desire.

Has your domain expert left the company and you need this expertise for an upgrade or a release? AimValley is often engaged by customers to work on the latest version of designs, especially when the initial internal designers are no longer available and the given domain experience is also gone.

In other cases, you may require functions that are considered legacy or common industry blocks. In both cases there may be no reason to have your own team “re-invent the wheel” on such technologies. A perfect example would be a set of Ethernet connection protocols for a new product.

AimValley has developed millions of lines of codes and offers many intellectual property blocks that were designed from the ground up. In many cases we have already been there and done that! If that is the case, we can save you money, save you time, and free up your own resources to work on your most important technologies

Why AimValley?

AimValley is a reliable provider of Edge technology since 2003, delivering solutions for:

- High speed data processing applications
- Complex FPGA-based accelerated systems
- High speed, low power hardware equipment
- Robust embedded software
- Early adopter of Acceleration Technology

Joint Development

Achieving your goals requires you to constantly adapt to new technologies. Based on your requirements, we design solutions and ways to jointly implement them.

Tailor-made Solutions

We collaborate with you to deliver your desired solution (complete product or only part of the development).

Fast-Track Development

Taking advantage of re-usable designs and IP enables us to develop your solution on a fast track.

Innovative Solutions

AimValley is continuously looking for alternative and optimized ways of designing high-tech products. We have an extensive patent library.

Phased Approach

Our design process is structured to successfully take your product from concept to production and flexible enough to allow you to leverage any of our services on a standalone basis.

Certification

AimValley is experienced in certifying products or systems, such as EMC/ESD, CB and CE.

Life Cycle Management

We offer life cycle management for the design and/or the product. This includes maintenance and component obsolescence management.

Quality Focus

- Outstanding track record of on-time delivery
- Best in Class Designs – Time, Budget & Quality
- ISO9001, ISO140001, Ecovadis Platinum CSR
