

Vacancy: NPI Engineer

Company : AimValley
Location : Hilversum (The Netherlands)
Relevant experience : at least 3 years

The Company AimValley (www.aimvalley.com)

AimValley, what we do

With almost 100 colleagues we provide Design Services dedicated to the development of complex embedded systems for telecom and datacom applications and other high tech applications. We offer our customers cost-optimal and energy-efficient products with a very high availability, a long lifetime and the ability to perform in harsh environments. AimValley has a strong track record in development of such products.

AimValley, organizational culture

At AimValley we have an open and direct culture. We are technology driven. Developers focus on "getting things done". We have short lines of communication and there is ample room for autonomy, driven by professionalism.

Teamwork is key to our success. Teams are grouped around a customer project and work systematically to provide the required features and the agreed time to market. We pride ourselves in delivering our projects on time and on budget.

Why work for AimValley as a NPI Engineer

- Challenging work in NPI of complex products
- Involvement in the end-to-end process from concept to finished product and system delivery
- A good Work/Life balance by flexible working hours (between 7 am and 7 pm) and a possibility to work up to 70% part-time and work remotely (max. 2 days)
- Excellent team spirit in a challenging environment
- Occasional travel to customers and/or EMS site (also abroad)
- Opportunity for personal growth in technical and managerial areas

The Job

To strengthen our activities in the NPI domain, AimValley is looking for an **NPI Engineer**.

We are looking for an Engineer who knows what it takes to manufacture high quality products. Together with the NPI Manager, the NPI Engineer is responsible for the manufacturing of the products of AimValley and its customers at the EMS partners.

The NPI team interfaces between the design teams and the EMS: There is a role for the NPI engineer both in product design and in manufacturing.

We foresee the following activities:

- Managing Technical Product Documentation for suppliers and EMSses
- Support / Manage production at the EMS for prototypes as well as for volume production.
Keywords are: planning, quality, test, cost
- Support the development of a test strategy with the design team
- Support / Manage the component library
- Support / Manage field returns / repair
- Support the orderdesk

This position requires:

- Education at MBO/HBO level in Electrical or Mechanical engineering or proven experience in a similar role
- Knowledge of Electronic and Mechanical product manufacturing
- A precise work attitude
- As you are interfacing with both the design team and Supplier / EMS, good communication skills in Dutch and English are required
- Ability to support multiple activities at the same time
- Interest in working with spreadsheets, databases and customer tools
- Availability for a minimum of 32 hours per week

Based on your personal skills and interests additional tasks may be added in the administrative or technical domain.

Other

- Willingness to travel and work occasionally at the customer/EMS site.
- Willingness to work outside normal working hours occasionally if required for the project.
